EXCEED YOUR VISION

Epson
Stylus Photo **RX520**

Print, scan and copy with our all-in-one
home photo centre

The Epson Stylus Photo RX520 is an all-in-one home photo centre. Photo-lab quality prints are quick and easy to produce. Plus you can scan and copy, and restore old and faded photos at the touch of a button.

Preview and select images on the 1.5" colour display

Produce photo-quality prints at home quickly and easily
The Epson Stylus Photo RX520 offers you photo-lab quality printing and high-performance scanning and copying – all in one desktop unit and without having to use a computer.

Easy to use
You can print high quality photos directly from all popular memory cards and from PictBridge and USB DIRECT-PRINT digital cameras.

A 1.5" colour display makes it easy to select images, choose the size you want and print multiple copies without having to use computer-based software. The PhotoEnhance function automatically adjusts the colour and contrast of images to give the best results so you can print, scan and enlarge your favourite photos quickly and easily whenever it suits you.

Quality scans and copies
The Epson Stylus Photo RX520 has a 1200 x 2400dpi scanner which means you won't lose the fine details of your photos when you scan and copy. So now you can make multiple copies and enlargements at home in one simple step. And if your photos are old and faded you can also choose to restore them at the same time.

The built-in transparency unit allows films, slides and negatives to be scanned at 2400dpi – ideal for digitally archiving your old images.

High quality, affordable prints
Epson's unique Micro Piezo™ technology allows tiny ink droplets to be produced. Combined with a high resolution printing of 5760 optimised dpi* , the results are beautifully clear and superbly defined photographs.

The Epson Photo Pack contains four individual ink cartridges and 100 sheets of Epson 10 x 15cm Premium Glossy Photo Paper, making home photo printing really convenient and very affordable. And having individual ink cartridges means that you only have to replace the cartridge that has run out. There's no waste.

Restore old photos
Epson Dust Removal function eliminates tiny dust specks from film scans and the Colour Restoration feature brings older, faded prints and film back to life. Select these options when scanning and you can revive those treasured memories without any fuss. It's the ideal way to restore your existing photo collection – simply digitise old images from prints or film, and then print bright new photos.

Key features and benefits

- Ideal all-in-one home photo centre

- Prints from all popular memory cards – no computer required

- Photo-lab quality printing at resolutions up to 5760 optimised dpi*

- Scan film and slides at 2400dpi with the built-in transparency unit
