

EPSON[®]
EXCEED YOUR VISION

Epson
Stylus Photo **RX640**

High quality prints, scans, and copies with our advanced all-in-one photo centre.

The Epson Stylus Photo RX640 is an advanced all-in-one photo centre. It has everything you need to produce high quality photos, copies and scans. Enjoy leading edge technology that is easy to use.

Preview and select images on the 2.5" colour display

Print high-quality photos at resolutions up to 5760 optimised dpi on suitable media

Print, scan and copy premium quality photos

The Epson Stylus Photo RX640 all-in-one photo centre offers you premium quality printing and high-performance scanning and copying. You can print stunning, vibrant photos quickly and easily whenever it suits you.

Uncompromised photo functionality

Use the 2.5" Photo Fine colour LCD preview display to view the composition of your images and to select and format the images you want to print. The Epson Stylus Photo RX640 has a built-in transparency unit so handling film, slides and negatives is simple.

High resolution scanning

The 3200 x 6400 dpi MatrixCCD™ scanner lets you capture detailed images to ensure sharp, well-defined copies and enlargements. And the on-screen menu display lets you print high-quality borderless photos directly, whether from digital, photo or film sources.

Perfect results every time

You don't have to be a computer expert to get the best photos from your printer. Use Epson's PhotoEnhance technology which automatically detects the type of scene and adjusts the colours accordingly. And use Epson's Easy Photo Fix software to restore old and damaged memories. It allows you to restore colour to older, faded photos and film, and the dust removal feature eliminates dust specks from film scans. It's the ideal way to restore and revive your old photo collection.

Affordable, versatile printing

The Epson Stylus Photo RX640 has six individual ink cartridges so you only have to replace the cartridge that has run out, making printing photos very economical. You can also save your images to CD or DVD* and customise by printing your own designs directly onto the CD surface**.

*via compatible mass storage device.

**for personal, non-commercial use only. Epson expressly disclaims any and all liability with regard to non-personal use.

You can print, scan and copy direct from memory cards, PictBridge and USB DIRECT-PRINT digital cameras, as well as selected USB flash memory devices. Or use a Bluetooth®*** module to print direct from your Bluetooth® mobile phone.

***Bluetooth® option is available in the EU countries, Iceland, Liechtenstein, Norway, Switzerland, Australia and New Zealand

Key features and benefits
