

EPSON[®]
EXCEED YOUR VISION

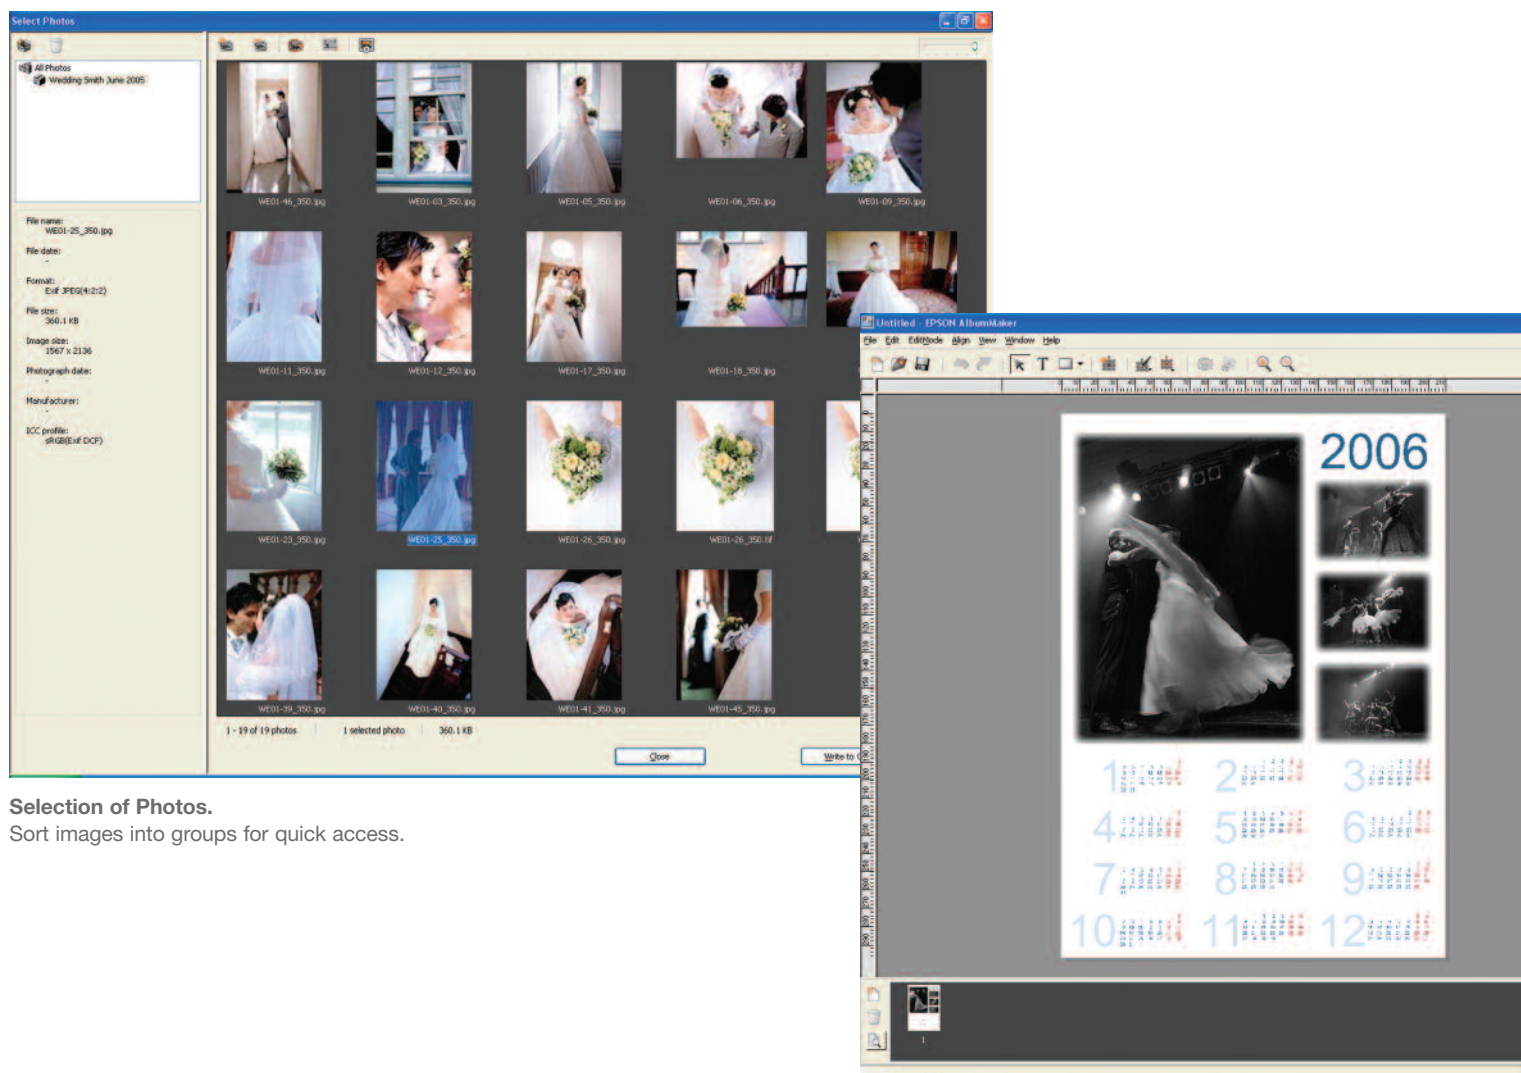

Epson **AlbumMaker** v2

Easy-to-use software that lets you
offer more to your customers

Epson AlbumMaker is an easy-to-use software package that lets you turn your photographs into creative presentations for your customers. You can create multipage albums, posters, calendars, CD-based slideshows and much more.

Selection of Photos.

Sort images into groups for quick access.

The easy solution for creative presentation of your work

Epson AlbumMaker gives you advanced photo presentation capabilities. It offers templates ideal for social and wedding photography as well as the option to create your own. Epson AlbumMaker also has the potential to add value to commercial photography and fine art printing.

Impressive results made easy

This user-friendly software combines drag-and-drop simplicity with creative flexibility. The system reads your photo data and combines it with pre-defined or customised templates. High-quality images are guaranteed with Epson's superior inkjet printers or the dedicated Epson Professional Portrait Printing System (Gemini).

The virtual workplace.

Drag & drop your images, change the layout, add pages, adjust images - all at your fingertips.

Powerful editing and image functions

You don't need to be a digital expert to use Epson AlbumMaker's extensive image editing features. It is easy to rotate, crop, adjust colour balance, sharpness, brightness and contrast, apply special filters such as sepia, monochrome and softness, and print in a range of sizes and finishes.

Pre-defined or custom templates

You can combine images with templates and clip art to create amazing results. Epson AlbumMaker comes with a set of standard templates that you can modify. Alternatively you can use Epson AlbumMaker or the Photoshop Plug-in to create your own.

Bring precious memories to life

Epson Photo Memory Player turns photo viewing into an audio-visual experience by creating slideshows or movie files with special effects and background music. Choose from a range of styles, displays and music tracks, with Full-Screen, Repeat, Random and Browse functions which can be embedded automatically onto a CD.

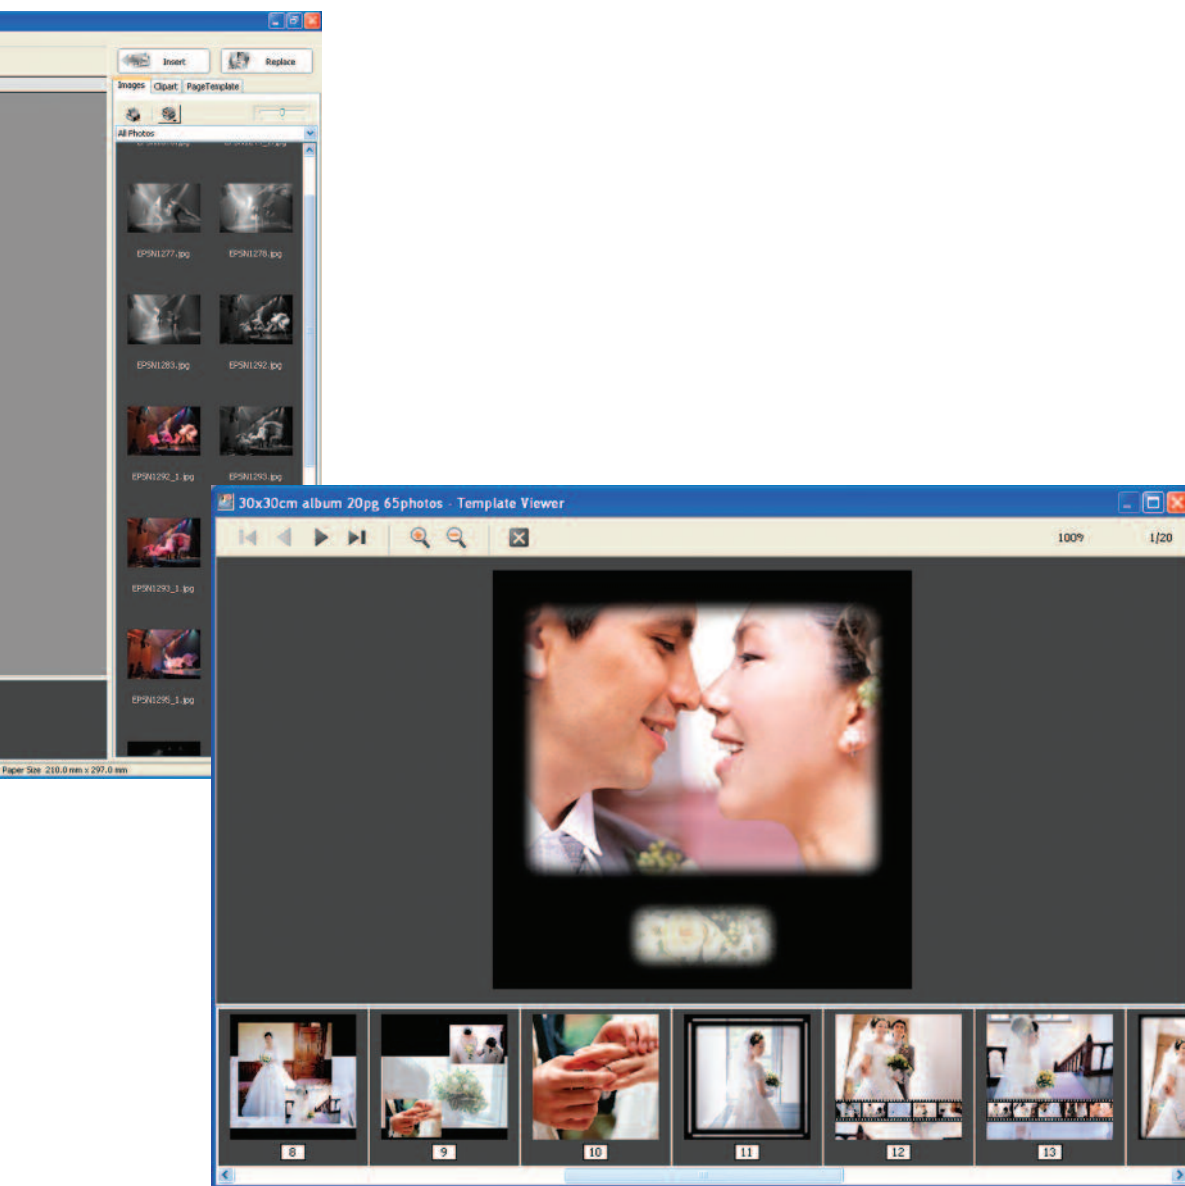

The ultimate finish

Epson's acclaimed printing technologies, including our unique Epson Ultrachrome K3 ink, produce exceptional black & white or colour prints with superb skin tones, colour accuracy and consistency. Epson AlbumMaker is the perfect partner for the Epson Stylus Pro series printers with its wide range of media and the Epson Professional Portrait Printing System (Gemini).

For users with lower productivity but professional quality requirements, Epson's Stylus Photo R2400 with Epson AlbumMaker offers the ideal entry into professional photo printing.
