EXCEED YOUR VISION

Epson **CopyFactory**

Easy-to-use software for high quality photo enlargements and copies

Epson CopyFactory is a scan-to-print solution that turns your Epson printer into a ready-to-use enlarger and copier system. Ideal for enlarging photos, graphics and reprographics, it gives you optimum control over your copies.

Superb copying for photographers and graphic artists
With Epson CopyFactory's advanced software, you get a whole range of functions that allow you to make high quality, large format copies, enlargements and other manipulations of original images, at the touch of a button.

Professional results every time
Effective, yet easy to use and manage, the simple scan-to-print system requires no previous graphics knowledge to produce truly professional looking results.
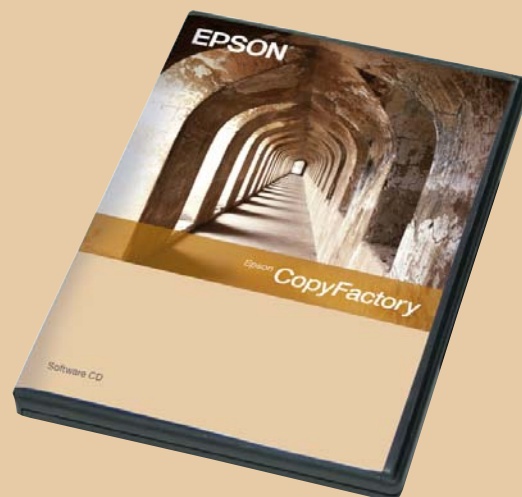

Epson CopyFactory will import scanned images, enhance them automatically or manually, and output to your Epson professional printer, producing reproductions and enlargements of any image, photo, poster or advert – all from a single software package.

Enhance your images with a range of advanced functions
With functions for cropping, auto skew correction, text overlay and converting colour to black and white, you can personalise artistic interpretation to get exactly the results you want from your image. Epson CopyFactory also offers three different settings for quality-controlling copies, from quick copies (A4 to Super A1 in 20 minutes) to quality enlargements.

Get the most from your images
- Exhibition-quality copies and enlargements
- Suitable for all photographers and graphic artists
- Functions for preview, highlight/mask text, brightness and contrast adjustment, gamut correction
- Prints up to 99 quality copies from enhanced images
- Epson professional printers use Epson Ultrachrome technology for vivid colours and smooth gradations
- Epson's MicroPiezo technology for efficient use of consumables
- No need for additional expensive software such as Adobe PhotoShop
