1 File Information:

File Name:	ICC Profiles for “Enhanced Matte Poster Board for Epson” media.
Version:	4.0
Supported OS:	Windows 98 / ME / NT / 2000 / XP / Vista / Seven / Windows 8 ; MacOS 8 / 9 / 10.2 or later
Supported Printers:	Stylus Pro 3800 / 4000 / 4400 / 4450 / 4800 / 4880 / 7400 / 7450 / 7600 / 7800 / 7880 / 9400 / 9450 / 9600 / 9800 / 9880 / 11880 ; Stylus Photo 2100 / R2400

2 Profiles Description:

These RGB ICC profiles are intended for prints with Enhanced Matte Poster Board for Epson media using EPSON Professional Inkjet printers and their Epson standard printer drivers.

For details see Annex 1

3 Installing ICC Profiles for Enhanced Matte Poster Board for Epson

To install the ICC profiles on your computer, you need to place them into the correct Operating System profiles folder. Please see the following table for the correct location of the profile folder for your operating system:

Operating System	Location of ICC Profiles
Windows 98 / ME	Windows / System / Color
Windows NT	WinNT / System32 / Color
Windows 2000	WinNT / System32 / Spool / Drivers / Color
Windows XP / Vista / Seven / Windows 8	Windows / System32 / Spool / Drivers / Color
MAC OS 8 / 9	System Folder / ColorSync Profiles
MAC OS 10.2 or later	Library / ColorSync / Profiles

4 How to print with ICC profiles using Adobe Photoshop for the color conversion

As example, this chapter shows the required Adobe Photoshop CS6 print dialog (for Previous version see Annex 2) and Epson driver settings.

Please note: The settings may slightly differ for different Adobe Photoshop versions and Epson printer models.

4.1 Start Adobe Photoshop and open the image that you want to print.

4.2 Open the menu **"File > Print with Preview"**

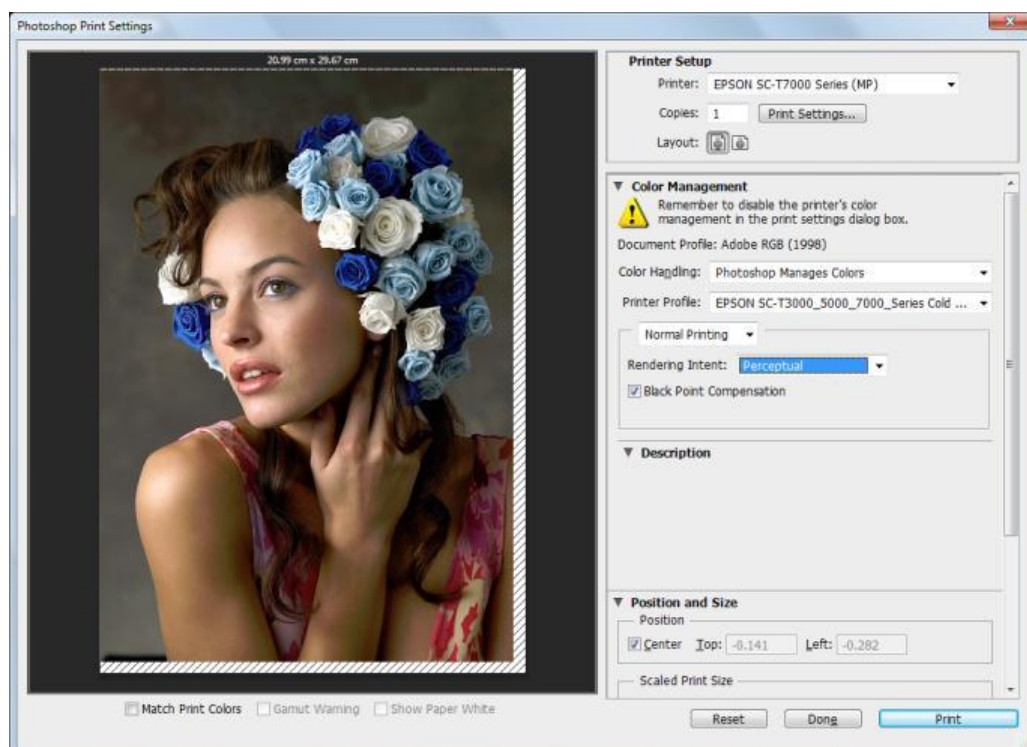

4.3 In the **"Print"** dialog select the **Color Management** menu.

4.4 Make sure that your image has an assigned **"Document"** (input) profile to ensure consistent color printing.

4.5 Select the color management **"Options"**.

- Choose **"Let Photoshop Determine Colors"** or **"Photoshop Manages Colors"** as **"Color Handling"**
- Select "Your Printer" Enhanced Matte Poster Board for Epson as **"Printer Profile"**
- Set the **"Rendering Intent"** to **"Relative Colorimetric"** or **"Perceptual"**
- Check the **"Black Point Compensation"** check box.

For Photoshop CS6:

Make sure that your image has an assigned "input" profile. If not, you need to select a profile from the "Edit → Assign Profile" menu in Adobe Photoshop's main menu view.

As Color Handling select **Photoshop Manages Colors** to allow Photoshop to perform the color conversion from the original image colour space to the printer media colour space.

As Printer Profile, select from the list the "Your Printer" Enhanced Matte Poster Board for EPSON of your printer model.

As Rendering Intent, select **Perceptual** or **Relative Colorimetric** according to your image type and colour gamut

Activate the **Black Point Compensation** to ensure that shadow details will be preserved.

4.6 Click on the **“Page Setup”** or **“Print settings”** button to open the Epson printer driver dialog.

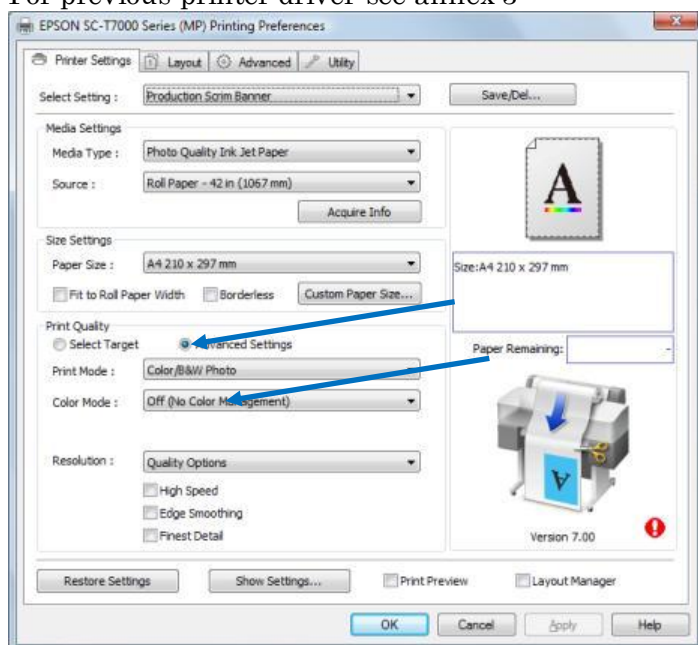

4.7 Import custom settings or make the following steps:

4.8 Go into the **“Advanced”** menu of the Epson printer driver dialog.

4.9 In the Advanced menu select:

- As **“Media Type”** the **Enhanced Matte Paper or Enhanced Matte Poster Board ... following printers**
- The desired print quality settings (i.e. Print Quality Resolution, High Speed on or off and Finest Detail on or off) ... following Manual printer driver settings sheet:

For previous printer driver see annex 3

- Disable the **“Printer Color Management”** by setting it to **“Off (No Color Adjustment)”** -> **Advanced Settings**.

4.10 Finally press the **“Ok”** button to exit the Epson printer driver and click on the **“Print”** button of Adobe Photoshop to print your image.

5 How to print with ICC Profiles using the Epson printer driver for the color conversion

If your application is not supporting the ICC workflow or is allowing to send unconverted image data to your printer driver, you can print selecting the ICC profiles directly in the Epson printer driver.

Please note: Not all Epson printer models and operating systems allow the selection of custom ICC profiles. Therefore we recommend to check your printer's user guide if your printer and operating system support this feature.

5.1. In your application select the “**Print**” menu to open the Epson printer driver dialog.

5.2. Go into the “**Advanced**” menu of the Epson printer driver dialog.

5.3. In the Advanced menu select:

As “**Media Type**” the **Enhanced Matte Paper, Enhanced Matte Poster Board ... following the instruction sheet (see manual and documentation on the web)**

The desired print quality settings (i.e. Print Quality Resolution, High Speed on or off and Finest Detail on or off) following Manual printer driver settings sheet

Choose “**ICM**” as “**Printer Color Management**”.

5.4. In the “**Driver ICM**” mode select:

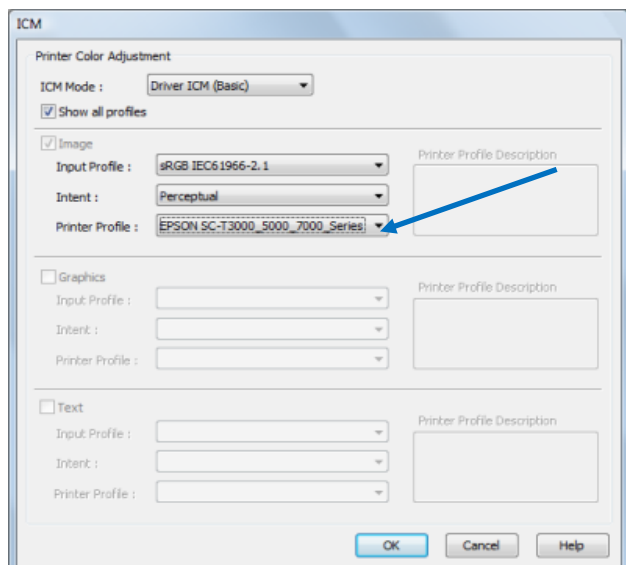

The same “**Input Profile**” color space as your image has.

Set the “**Rendering Intent**” to “**Relative Colorimetric**” or “**Perceptual**”.

Activate the check box “**Show all profiles**”

Select as “**Printer Profile**” “**Your Printer**” Enhanced Matte Poster Board for Epson

(For previous version see annex 4)

Select **ICM** as Printer Color Management mode.

The first thing to do is to enable the **Show all profiles** option that will allow you to see and select all the ICC profiles installed on your computer.

As ICM Mode, select the **Basic** mode.

As Input Profile, select your document profile or define a profile by choosing it from the list. **Adobe RGB (1998)** or **sRGB** profiles are both suited for colour images printing. (Not ICC workflow supporting applications will mainly use the sRGB colour space)

As Intent, choose **Perceptual** or **Relative Colorimetric** according to your document type and color gamut

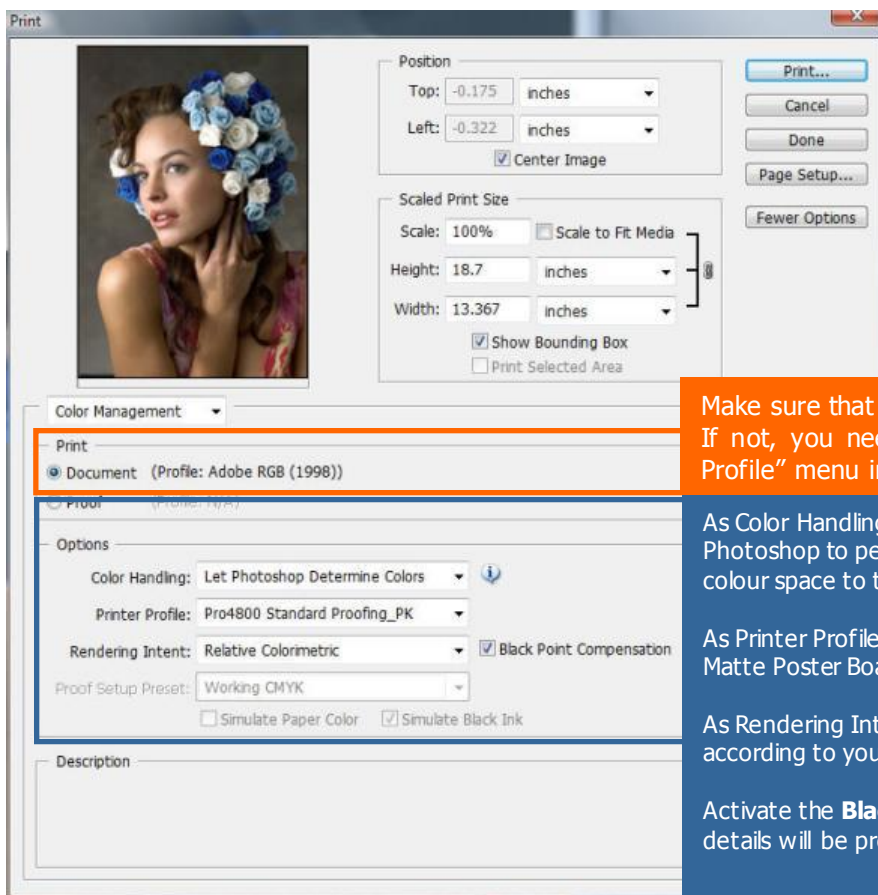

As Printer Profile, select from the list the “**Your Printer**” Enhanced Matte Poster Board for Epson profile of your printer model.

5.5. Finally press the **“OK”** button to exit the Epson printer driver and click on the **“Print”** button of your application to print your image.

Annex 1 - Profile description

Annex 2 - How to print with ICC profiles using Adobe Photoshop for the color conversion for Photoshop CS2.

Make sure that your image has an assigned "input" profile. If not, you need to select a profile from the "Edit → Assign Profile" menu in Adobe Photoshop's main menu view.

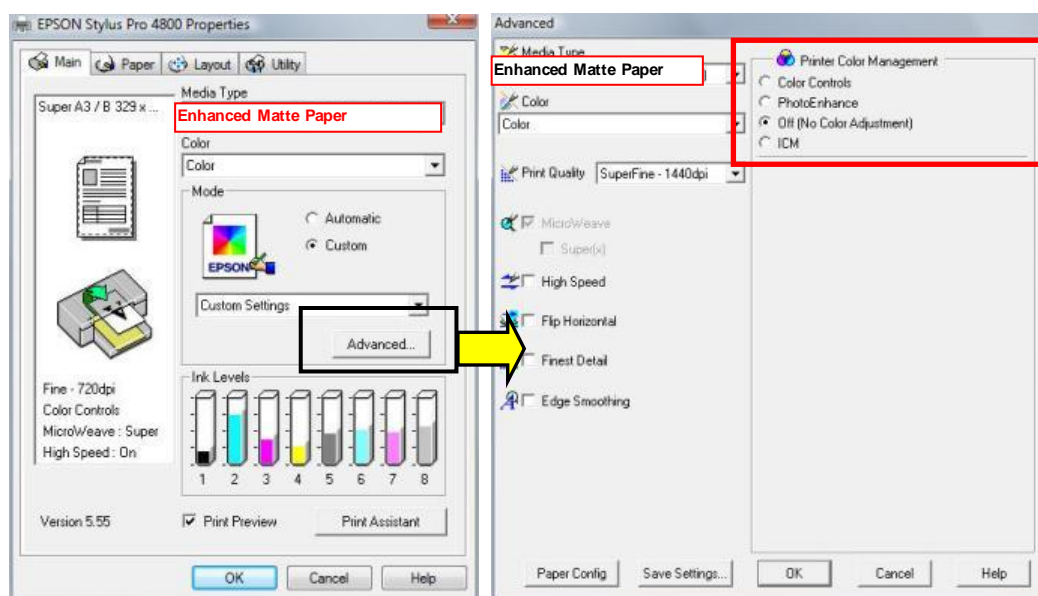

As Color Handling select **Let Photoshop Determine Colors** to allow Photoshop to perform the color conversion from the original image colour space to the printer media colour space.

As Printer Profile, select from the list the "Your Printer" Enhanced Matte Poster Board for Epson profile of your printer model.

As Rendering Intent, select **Perceptual** or **Relative Colorimetric** according to your image type and colour gamut

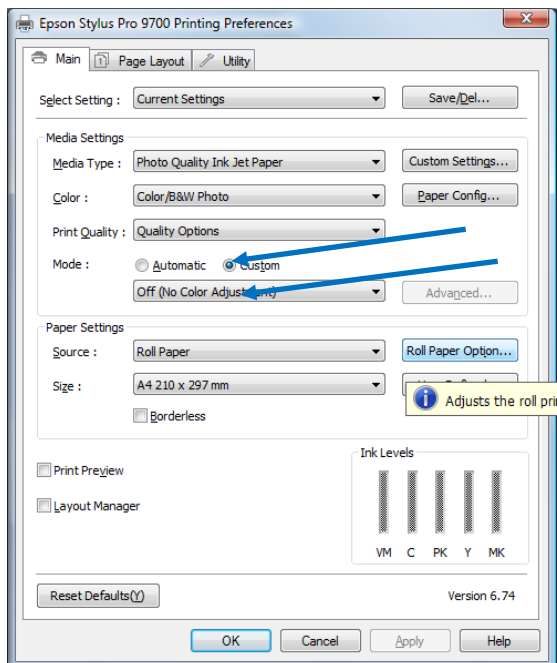

Activate the **Black Point Compensation** to ensure that shadow details will be preserved.

Annex 3 - Go into the "Advanced" menu of the Epson printer driver dialog

When you print using the Color Handling **Let Photoshop Determine Colors**, it is very important to disable the printer color management by setting it to **Off (No Color Adjustment)**. Otherwise you will apply a double colour conversion process (one by Photoshop + one by the printer driver) that will generate inaccurate colour results.

- Disable the "Printer Color Management" by setting it to "Off (No Color Adjustment)".

- Disable the “Printer Color Management” by setting it to “Off (No Color Adjustment)” -> Mode Custom.

Annex 4 - In the “Driver ICM” mode select
