## **Home Screen Operations**

### Approx. remaining levels of consumables

As the ink is consumed or the maintenance box becomes full, the corresponding bar becomes shorter.

When  $\triangle$  is displayed on bars, prepare a new ink cartridge or a maintenance box. You can continue printing until replacement is required.

### Touch this icon...

You can see the consumable product numbers.

#### The network connection status

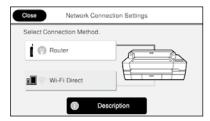

The icon changes according to the connection method. While the printer is connected,  $\widehat{\varsigma}$  is blue and indicates the signal strength.

Wired (Ethernet)

Wi-Fi (Wireless)

Wi-Fi Direct

The Touch this icon...

You can change the connection method.

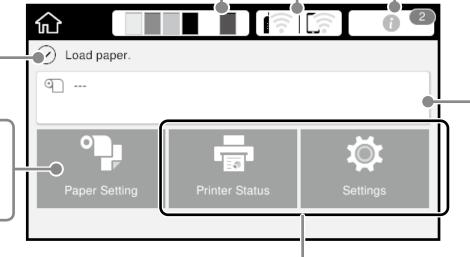

For information on Wi-Fi Direct, see below.

"Other Printing (Wi-Fi Direct Printing/Print from an Upload)" on page 13

### The current printer status

### Touch to load or remove paper.

"Getting Ready to Print" on page 4

Touch to check the printer status or change the printer settings.

If appears, some items may not be displayed.

Example: SC-T5400M Series

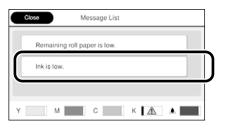

Copy
Scan
twork Folder

The home screen is displayed when the printer is turned on. These pages show the available operations on the home screen.

#### The number of notices

The number of notices, such as ink low warnings, is displayed on the icon.

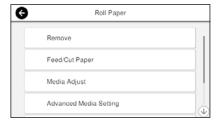

A list of the notices that require your action is displayed. You can see instructions on what to do when you touch each notice.

When you complete the actions for all the notices, the number disappears from the icon.

#### **Roll paper information**

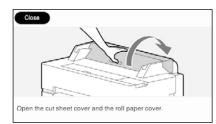

The paper type and roll paper width that have been set are displayed.

#### Touch after loading roll paper...

You can perform actions such as replacing roll paper.

### Touch before loading roll paper...

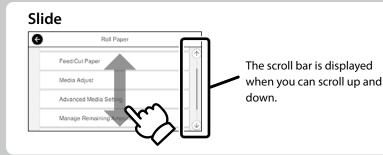

Instructions on how to load roll paper are displayed.

#### □ Touch Panel Operations

### Touch (tap)

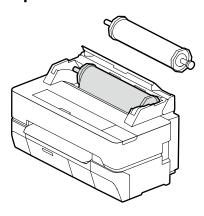

## **Getting Ready to Print**

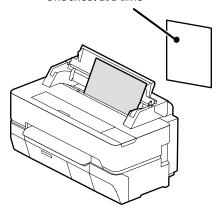

## **Check the Paper Loading Positions**

#### **Roll Paper**

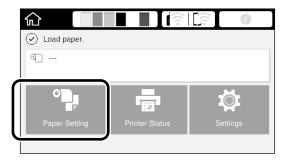

#### Cut Sheet (1 sheet)

A4 to the maximum print width One sheet at a time

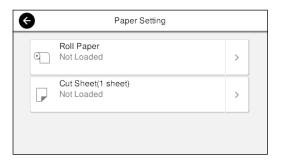

## Load the Paper Following the On-Screen Instructions

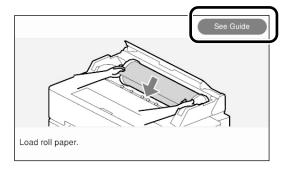

Touch **Paper Setting**.

2 Select one of the paper sources.

Touch **See Guide** to see the detailed on-screen instructions.

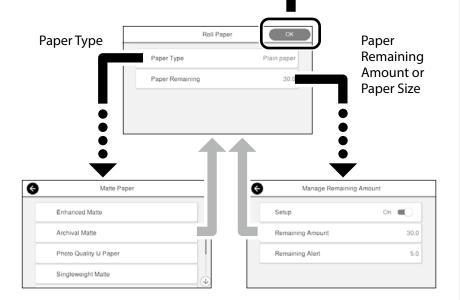

When **Load paper** is displayed on the home screen, you can open the cut sheet cover and load a cut sheet into the printer.

These pages explain how to get the printer ready for printing. Carefully follow these steps to get optimum print quality.

### **Set the Paper Type and Paper Size**

The setting items vary according to the paper. If you select a paper type or size that does not match the loaded paper, the printout will have creases, ink smudges, or banding.

Press **OK** after you complete the settings

Promptly select the settings because the paper will start being fed if the screen is not used for 90 seconds.

#### **Epson Special Paper**

Select the paper name printed on the paper package.

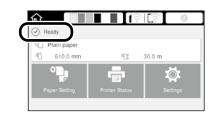

#### **Non-Epson Paper**

Select one of the following.

- Plain Paper
- Coated Paper <Generic>
- Photo Paper <Generic>
- Tracing Paper
- Tracing Paper <LowDuty>
- Matte Film

#### **Print**

When **Ready** is displayed, you can start printing.

## **Printing CAD Drawings**

### **Using the Printer Driver**

This method is best suited to printing CAD drawings, such as appearance view of buildings, at high quality.

### **■** Important

If lines or parts on your drawing are not printed properly, use the HP-GL/2 or HP RTL mode.

The procedure below is for AutoCAD 2018.

1 Clic

Click **Plot**.

Select the printer in **Printer/plotter**, and then click **Properties**....

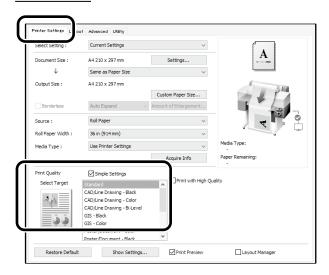

Click Custom Properties.

The printer driver screen is displayed.

Select **CAD/Line Drawing** at **Printer Settings** tab.

#### **Windows**

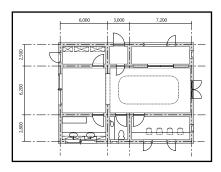

#### <u>Mac</u>

Print CAD and GIS drawings using either of the following two methods depending on the intended use of the drawing.

### **Using HP-GL/2 or HP RTL Mode**

This method is best suited to printing CAD and GIS drawings, such as maps and blueprints.

You can print from an application that supports HP-GL/2 (compatible with HP DesignJet 750C) and HP RTL.

The default paper source is **Roll Paper** and the default print quality is **Standard**. If you want to change the settings, change them from the printer setting menu before performing the procedure below.

The procedure below is for AutoCAD 2018.

1

Click **Plot**.

2

Select plotter in **Printer/plotter**.

Select the plotter name as shown below according to your model.

SC-T5400 Series: HP DesignJet 750C C3196A SC-T5400M Series: HP DesignJet 750C C3196A SC-T3400 Series: HP DesignJet 750C C3195A SC-T3400N Series: HP DesignJet 750C C3195A

#### ■ When nothing is printed or text is garbled

Change the printer setting as follows.

Settings - General Settings - Printer Settings - Printing Language - USB (or Network) - HP-GL/2

When you print using the printer driver, change the setting back to **Auto** from **HP-GL/2**.

■ When you want to print on a cut sheet or change the print quality setting

Select your target setting item from the printer setting menu shown below.

Settings - General Settings - Printer Settings - Universal Print Settings

**☐** When you want to change the pen width or pen color

Select your target setting item from the printer setting menu shown below.

Settings - General Settings - Printer Settings - HP-GL/2
Unique Settings

When you want to print on oversized paper

Load the printer with paper larger than the original size, and then change the printer setting as follows.

Settings - General Settings - Printer Settings - Universal Print Settings - Page Margins option - Oversize

## **Printing Banners**

#### **Steps to print a banner**

Create the original in the application\*

Select the enlargement method in the printer driver

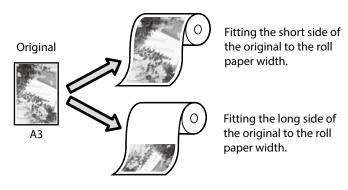

**Print** 

\*For creating a non-standard size original, see below.

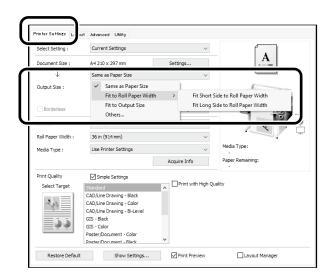

"Printing at Non-Standard Sizes" on page 10

## Fitting the Original to the Roll Paper Width

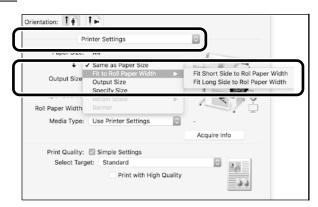

Select **Output Size** - **Fit to Roll Paper Width**, and then select whether to fit the short side or long side of the original to the roll paper width.

#### **Windows**

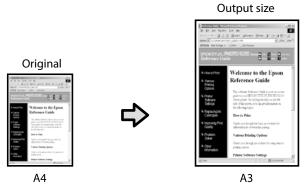

#### <u>Mac</u>

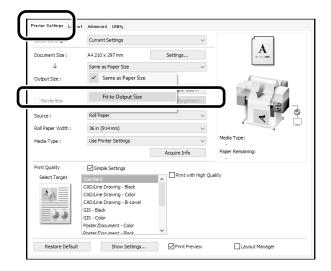

These pages explain how to enlarge and print an original created at a standard size for a banner.

## Fitting the Original to the Output Size

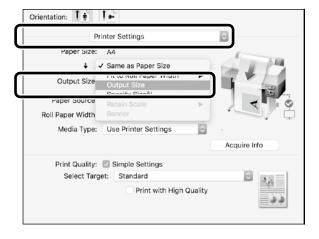

Select **Output Size** - **Fit to Output Size**, and then select the output size.

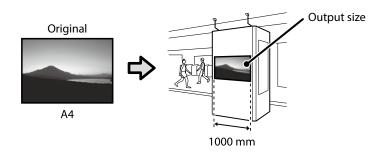

### Windows

#### Mac

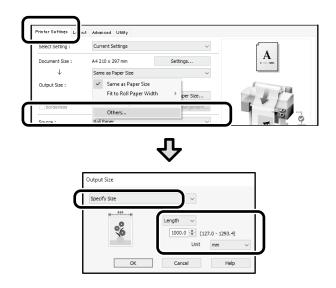

### **Specifying the Size**

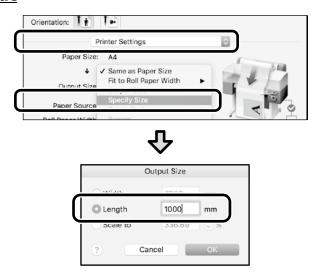

Select **Output Size** - **Specify Size**, and then select the output size or enter magnification.

#### **Windows**

#### Mac

## **Printing at Non-Standard Sizes**

#### Steps to print a non-standard size

Register and select the paper size in the application

Create the original

Enlarge and print the original

These pages explain how to create an original that is about one-third of the output size and then enlarge and print that original to create a banner that fits the width of 24-inch (610 mm) roll paper.

#### Paper size (original)\*

#### **Output size**

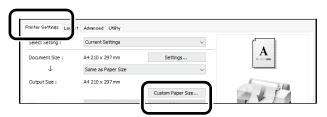

\*You can configure the paper size as shown below. Paper Width: 89 mm to maximum printing width Paper Height: 127 mm to 18,000 mm (Windows) Height: 127 mm to 15,240 mm (Mac)

### **Register and Select the Paper Size**

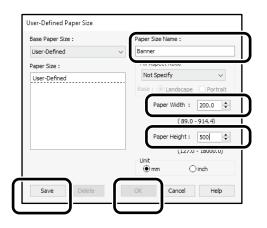

#### **Windows**

- Start the application, click the **File** menu, and then click **Print**.
- On the **Printer Settings** tab, click **Custom Paper Size...**

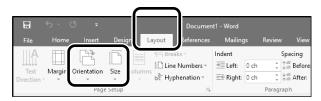

Enter the following information on the **User- Defined Paper Size** window.

Click **Save**, and then click **OK** to finish registering the paper size.

2 Select the registered paper size.

Example: Microsoft Word 2016

Orientation: Landscape

Size: Banner

If the registered paper size is not displayed, check the paper sizes supported in the application.

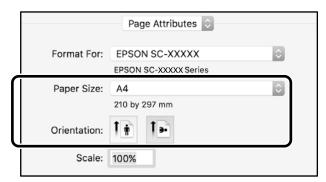

These pages explain how to create and print an original with a non-standard size, such as a banner or square shape.

#### Mac

Start the application, and then click **Page Setup**.

If **Page Setup** is not displayed due to the application, select **Print**.

For **Orientation**, select ., and for **Paper Size**, select **Manage Custom Sizes**.

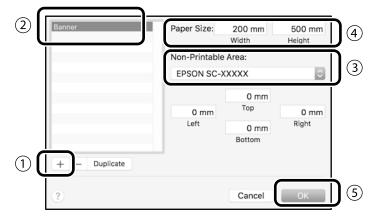

Register the paper size in the following order.

For ②, enter "Banner" as the name of the paper size.

For (3), select the printer name.

Click **OK** to finish registering the paper size.

### **Create the Original**

Create the original using the application.

### **Enlarge and Print the Original**

Load 24-inch roll paper, and then enlarge and print the original by fitting it to the roll paper width.

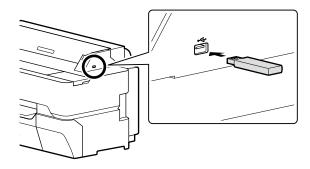

For enlarging and printing the original, see below.

"Printing Banners" on page 8

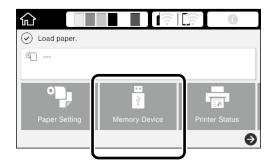

## Printing by Installing a USB Flash Memory

You can print JPEG files or TIFF files saved on a USB flash memory by installing it on the printer.

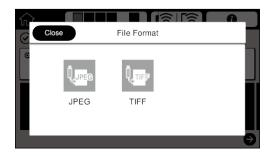

Install the USB flash memory in which the data to be printed is saved onto the printer.

From the home screen, touch **Memory Device**.

Select the file format.

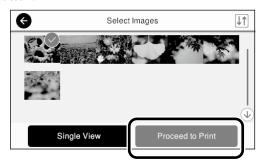

A Select one file to print.

#### When printing TIFF

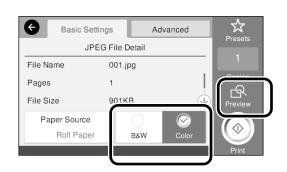

#### When printing JPEG

After selecting the file, touch the **Proceed to Print** button.

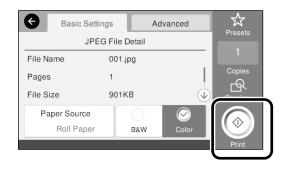

Select **B&W** or **Color**.

You can check the image to print with the **Preview** button.

Touch the **Print** button.

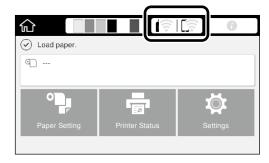

## Other Printing

### (Wi-Fi Direct Printing/Print from an Upload)

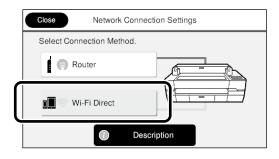

## Printing by connecting with Wi-Fi Direct

Use Wi-Fi Direct to connect your device to the printer when you are outside the office and cannot connect to the printer over a wired or wireless connection.

Touch 🋜 🛜 on the home screen.

Touch Wi-Fi Direct.

Follow the on-screen instructions to complete the connection setting.

Print by using the printer driver or other functions.

See the User's Guide (online manual) for how to print.

## Print from an Upload using Web Config (SC-T5400M Series)

Using Web Config to print from an upload, allows you to print from a computer that does not have the printer driver installed.

The following are files that can print from an upload.

- JPEG
- HP-GL/2
- TIFF (data created on the printer only)
- PDF (data created on the printer only)
- Start a web browser on a computer that is connected to the printer via a network.
- Enter the printer's IP address into the address bar of the web browser, and then press the [Enter] or [Return] key.
- 3 Show the **Print** tab.

If the **Print** tab does not appear, contact your system administrator.

Start printing by dragging and dropping the data.

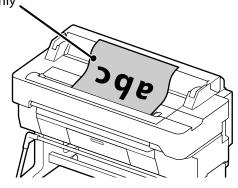

## Loading an Original for Copying/ Scanning (SC-T5400M Series)

This section explains an overview of loading an original to copy and scan.

## Supported Sizes and Types of Originals

### Size of original

Width of original: 148 mm to 914 mm (36 inches) Length of original: 148 mm to 30,480 mm (1,200 inches)\* 1 sheet only

Note the following when loading the original.

- Align the original along the right edge
- Load the original with the side to be scanned up
- Load the original in the direction of the picture

#### **Original types**

- Plain paper
- Recycled paper
- Coated paper
- Glossy paper
- Tracing paper
- Film
- Blueprint
- Actual printing stock
- Newspaper
- Flyer
- Drafting paper
- Japanese calligraphy paper

Use the optional carrier sheet for thin originals and originals that you do not want to damage. See the User's Guide (online manual) for how to use the carrier sheet.

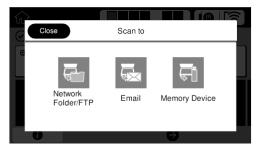

\* Depending on the settings and the data format, the maximum length may be different.

## **Loading the Original while Viewing the Guide**

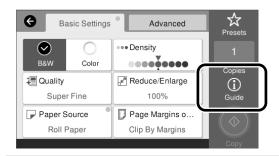

Touch Copy or Scan.

When scanning, select where you want to save the data.

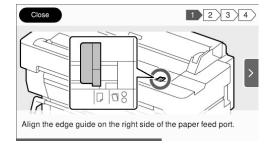

**7** Touch **Guide**.

If the original is already loaded, **Remove** appears.

If you want to reload the original, touch **Remove** and load the original again.

Follow the on-screen instructions to load the original.

# Procedure for Copying (SC-T5400M Series)

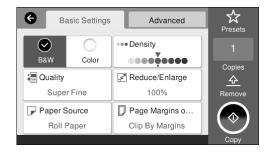

This section explains the procedure for copying after the original is loaded.

1 Load the original.

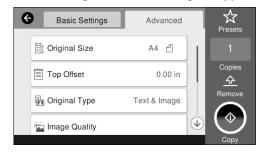

"Loading an Original for Copying/ Scanning (SC-T5400M Series)" on page 14

**D**o the settings for copying.

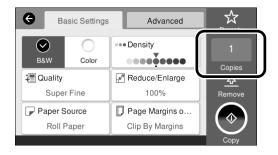

In **Basic Settings**, set the Color, Quality, Density, and Reduce/Enlarge.

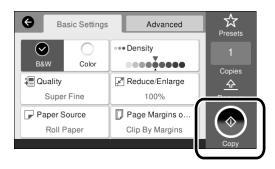

Do the settings from **Advanced** when you are doing detailed settings, such as the Original Type.

Set the number of copies.

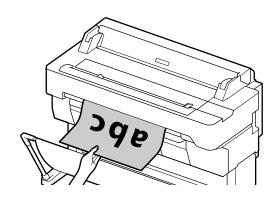

Touch the **Copy** button to start scanning the original.

Remove the original when scanning is complete.

While holding the original, touch the **OK** button on the screen, and then remove the original.

Printing starts when the original has been completely removed.

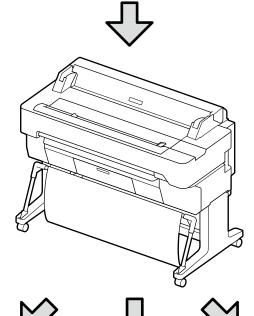

If you want to eject the original, without holding it at the eject slot, after it has been scanned, set the following on the printer's menu.

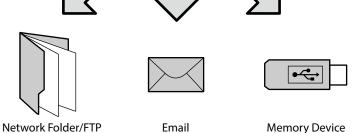

Settings - General Settings - Scan Settings - Scan Options - Confirm Before Ejecting Scanned Document - Off

## Procedure for Scanning (SC-T5400M Series)

You can scan documents and CAD drawings, make them into image data, and then save the data or send it via email.

Network Folder/FTP	You can save the data in a specified folder (shared folder) on the network.
Email	You can send the data as an e-mail attachment directly from the printer.
Memory Device	You can save the data to a USB flash memory that is installed in the printer.

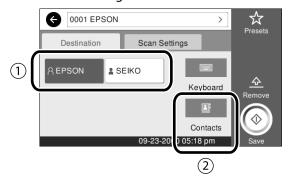

You must do settings in advance to save to a network folder/FTP or to send as an email. See the Administrator's Guide for more details.

Load the original.

"Loading an Original for Copying/ Scanning (SC-T5400M Series)" on page 14

2 Specify the destination or where you want to save the data.

Specify the destination or where you want to save the data by entering the destination directly or by selecting the destination from a list of destinations that has been registered in advance.

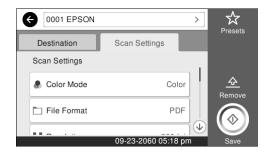

① Destination tab	Specify from the registered destinations.
②Contacts	Specify from the destinations registered in your Contacts. You can also register new destinations.

If a destination is not registered in your Contacts, select **Keyboard**. See the User's Guide (online manual) for more information.

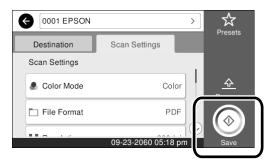

3 Do the settings for scanning in **Scan Settings**.

Select the Color Mode, File Format, and other such items.

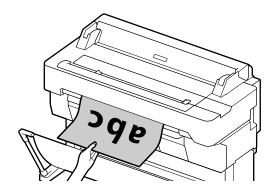

There are 3 ways that you can save or send the data of scanned images.

original.

Remove the original when scanning is complete.

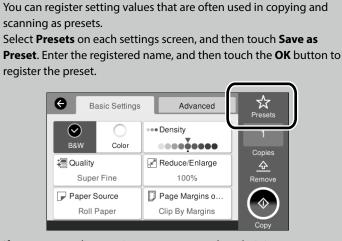

> While holding the original, touch the **OK** button on the screen, and then remove the original.

If you want to eject the original, without holding it at the eject slot, after it has been scanned, set the following on the printer's menu. **Settings - General Settings - Scan Settings - Scan Options** 

- Confirm Before Ejecting Scanned Document - Off

Touch the **Save** button to start scanning the

### **Meaning of Symbols**

<b>■</b> Important	Important must be followed to avoid damage to this product.
A	Indicates related reference content.

### **Product Model Descriptions**

Some models described in this manual may not be sold in your country or region.

## **Troubleshooting**

#### **Solutions**

#### **Horizontal or Vertical Lines**

Double Ruled Lines or Warped Characters

emmanen and Aufdruck. W I 5008 "Regel

Creases, Scuff marks, or Uneven colors

Perform the solutions in the following order until the printed results have improved. Start by reloading the target paper.

#### **Check the Paper Type Setting**

Touch **Paper Setting** on the home screen and make sure the set paper and paper type are matching. If the paper type setting is incorrect, touch the target paper source and change to the correct paper type.

For how to set the paper type, see below.

"Getting Ready to Print"-"Set the Paper Type and Paper Size" on page 5

If the printed results did not improve

#### **Perform Easy Adjustment**

From the home screen, touch **Paper Setting** - target paper source - **Media Adjust** - **Easy Adjustment**. Follow the on-screen instructions to complete the adjustment.

- When an Error message is Displayed
- If the adjustment results are not satisfactory

**Perform Paper Feed Adjustment or Print Head Alignment** For details, see the User's Guide (online manual).

#### **Ink Drops**

Perform head cleaning.

From the home screen, touch Settings - Maintenance - Print Head Cleaning.

Lines appear on the scanned or copied document.

The glass surface of the scanner is dirty. See the User's Guide (online manual) for how to clean the glass surface.
